

iBOLT Special Edition for SAP Business One

Comprehensive toolset for seamless integration with SAP Business One

Extend the capabilities of SAP Business One, deliver more value to your clients, increase your productivity and reduce your project risk.

iBOLT™ is Magic Software's easy-to-use and cost-effective, GUI-based business integration suite. iBOLT Special Edition (SE) for SAP® Business One extends SAP's software development kit, while providing all required interfaces for SAP Business One.

Using an intuitive, wizard-based interface with SAP Business One, you can respond to a wide range of business process automation requirements that cannot be satisfied with the stand-alone ERP package.

As an end-to-end business integration solution, iBOLT SE assures seamless connection between SAP Business One and your clients' customers and partners, legacy systems, CRM, ERP, and SCM systems. It can also be used to connect geographically separated trading partners.

Empower your clients by:

- Automating manual communication with trading partners
- Connecting existing e-Commerce site to SAP Business One
- Handling service requests to SAP Business One via the Web
- Allowing customers to submit orders to SAP Business One via the Web
- Facilitating EDI transactions with SAP Business One
- Sharing data across systems and combine processes
- Consolidating charts of accounts
- Synchronizing company data across multiple SAP Business One sites
- Logging in-coming email
